Introducing the NEW LBX Fluid Analysis Program

Lexington, KY - LBX Company, LLC, maker of the Link-Belt excavators, is pleased to announce the launch of the new LBX Fluid Analysis Program. This new program will allow companies to safely extend oil drain intervals, extend equipment life and minimize downtime by identifying minor problems before they become major failures.

“We are very pleased to offer our Link-Belt excavator customers the opportunity to maintain their equipment at the highest levels possible using this new program,” said Randy Young, National Service Manager for LBX. “We focus on keeping our customer’s equipment up and running so that they are as productive, competitive and profitable as possible. The program also can increase resale value, because analysis results provide valuable sampling histories that easily justify higher equipment resale values.”

The LBX Fluid Analysis Program provides diagnostic testing designed to evaluate lubricant condition, component wear and contamination. All testing is provided by ISO 17025 A2LA accredited laboratories that are regionally located to ensure expedient processing. Lab locations are: Indianapolis, IN; Houston, TX; Salt Lake City, UT and Edmonton, AB Canada.

###

LBX Company LLC is the proud maker of Link-Belt excavators, scrap/material handlers, demolition equipment and forestry equipment. These Link-Belt products are sold through a large independent dealer network located throughout the Western Hemisphere. Headquartered in Lexington, KY, LBX offers its dealers a wide range of support and services including: financing, world-wide equipment parts order fulfillment through the Lexington-based LBX Parts Distribution Center, full Isuzu engine support, on-site product demonstration and testing grounds, and in-house technical and product support.
